

EASY EXTEND'R SWIM PLATFORM INSTALLATION INSTRUCTIONS

Mark position of Strap Eyes

Drill 1/8" holes, lightly countersink

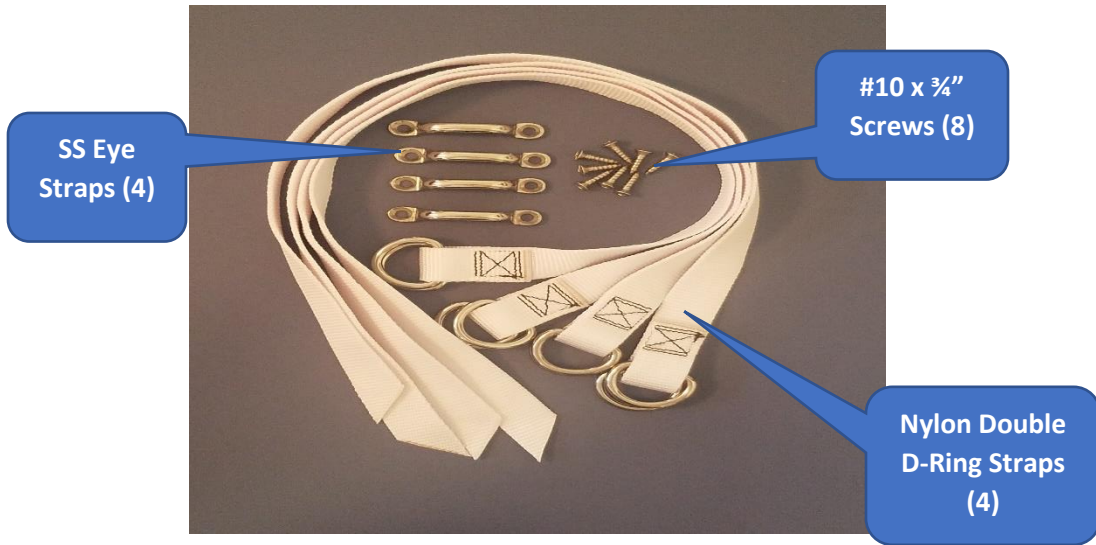

Screw Strap Eyes to Hull

NOTE: The waterline needs to be marked without people in the stern.

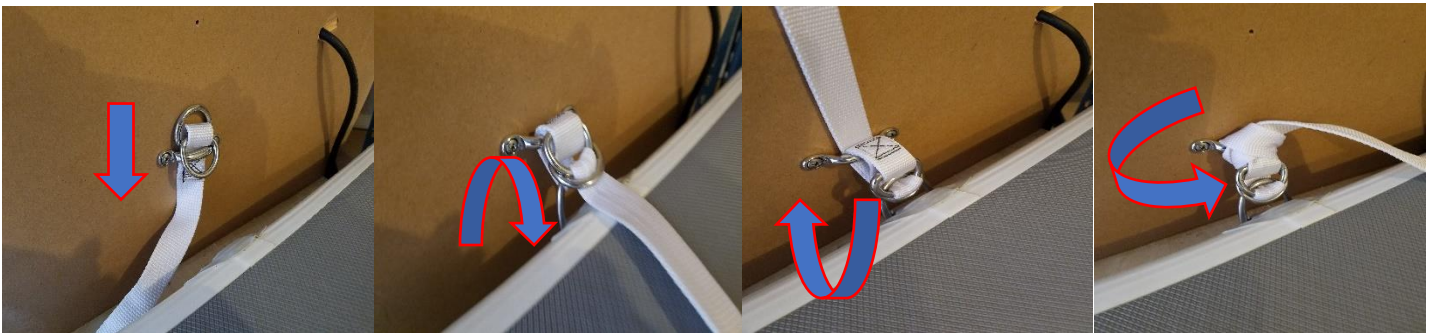

1. Center the platform on transom, position so bottom of platform is about 1" under the waterline.
2. Mark the positions of the D-Rings of the platform on the transom where the Eye Straps will go.
3. Drill 1/8" holes and lightly countersink them to prevent cracking the gel coat.
4. Install the Eye Straps using a marine sealant and the supplied SS Screws.
